¿What is KICSO?

It is a cybersecurity assistant powered by advanced generative AI to simplify security management. It detects, prevents and expects threats that harm your business.

OPERATIONAL QUALITIES

Monitoring and notification
Detects threats and sends alerts by integrating multi-technology IoT and security systems

Legal and technical traceability
Logs and certifies security events with **DLT technology** (blockchain)

Automated regulatory compliance
Compliant **(NI2)** and centralizes documentation for audits and regulators

Risk assessment
Anticipates threats with predictive analytics and suggests actions in real time

FIRST SAAS SOLUTION TO INTEGRATE
GEN AI + DLT TRACEABILITY + REAL-TIME EVENT CENTRALIZATION

1. Interaction intelligent via chat
It allows consulting the status of organizational security and suggests corrective actions.

2. Centralized system and automated
It integrates data from multiple sources, to offer a complete and clear view of everything that happens on the network, following every event.

3. Validation documentary automated
Allows documents to be uploaded for automatic analysis, identifying risks, errors and opportunities for improvement, according to industry standards.

What makes **KICSO** unique?

Sector-modulated assistant
Adaptable to standards with configurations by industry

Native integration with security
Wizard integrating SIEM tools, EDR, firewalls, endpoints and ticketing systems

Isolated assistant from the Internet
It has an exclusive repository, designed for each industrial sector

Advanced predictive capabilities
Allows to anticipate incidents before they occur

Why is it a good choice?

Time and operating cost savings
Generates economic value by optimizing resources

More competitiveness
Streamlines the go to market, complying with local and international regulations.

Improvement of the productivity
Reduces the operational burden due to repetitive tasks

Complete security governance
Technical and strategic vision for the CISO and senior management.

Security of the information
Confidential data secure, with no exposure of information to third parties.

Market differentiation
Attracts customers, investors and strategic partners

KICSO
THINKING **WITH** YOU. WORKING **FOR** YOU.

KICSO belongs to our **KISAI** line of Generative AI intelligent assistants. It is designed to transform and optimize the processes and decisions of organizations and can be adapted to different sectors of activity.

powered by *aindeep*

We are a company specialized in cloud services that integrates AI and cybersecurity to offer intelligent assistants capable of automating critical processes, strengthening governance and ensuring regulatory compliance.
